

Invitation for “Joint seminar on Integrated Risk Informed Decision making organised by Risk Science and Technology Division of AESJ (Japan) in co-operation with Safety Assessment Section of IAEA”

The Risk Science and Technology Division of Atomic Energy Society of Japan (AESJ) is engaged in various activities to promote the use of risk information. The IAEA has recently published a report on the use of risk information, “IAEA-TECDOC-1909, Considerations on Performing Integrated Risk Informed Decision Making” .

We will invite main authors of the report and have the webinar.

We believe that this TECDOC is informative for considering the use of risk information and we invite you to participate in this valuable webinar. The webinar presents IRIDM activities in Japan, the IAEA's perspective on TECDOC -1909, overview of TECDOC, application of IRIDM process, etc.
